## 综合写作要点：

1, 阅读观点+原因; 观点句要改写, 原因简化点, 听力反对啥, 你阅读证据概括啥, 不要长篇大论; 听力内容尽可能用原词, 内容尽可能要详细

【阅读原因概括原则: 听力反对的内容, 一定不能少, 没有反对的, 想加可以加】

2, 听力笔记要点, 每句话挑出来2-3个关键词

3, 在提出观点的词汇的用法上, 要多样化。

4, 转折词汇的应用上, 要多样

5, 如果听力实在听不出来, 那么可以多概括一些阅读的内容

6, 字数300-350

观点词: Mention, refute, contend, argue, point out, contradict, find out, believe, hold, disagree, consider

范文：

From my perspective, I tend to support Penny's opinion children should not be allowed to watch a lot of videos online.

Apart from her reasons, another reason I want to add is that children are usually under 12 years old and at this stage, they usually cannot tell right from wrong. In this case, giving children the permit to watch videos online for entertainment may expose them to something that may impact their lives negatively as in the information era, everyone can be the author of online materials. For instance, somebody may post a video of violence, like beating people or violent games, to be eye-catching. Children who watch that video may feel excited by that video and may even want to imitate the behaviors in the video instead of turning it off in disgust.

To sum up, watching videos is not a good way to entertain for children.

Andrew presents a compelling argument in favor of endorsing student sports activities. Admittedly, sports participation is a superb means to promote students' physical health. Nevertheless, considering the university's responsibilities in fostering academic preeminence, I am inclined to prioritize the construction of a new library.

In my view, a new library can enhance teaching and scholarly communication. A well-equipped library, serving as a platform for academic exchange and cooperation, not only provides access to print books but also offers high-speed Internet connectivity and databases for interdisciplinary collaborations. For example, as collaborative programs across disciplines continue to increase, both faculty and students in our Architecture Department require establishing a new library that enhances networks across departments, which will profoundly enrich the interdisciplinary collaboration database.

Therefore, I firmly believe that giving priority to constructing a new library, through integrating multidisciplinary materials will substantially improve scholarly communication and strengthen our research capabilities.
